

Dedicated Internet Access (DIA)

If your business uses the Internet as a tool to do business, to transfer large amounts of data, or to support applications like voice and video, then you know how important a stable, secure connection is to your bottom line. Downtime or inconsistent bandwidth is not an option and can even mean lost business.

ENMAX Envision's Dedicated Internet Access is a high-speed, reliable, always-on connection to the Internet from a fixed location. It provides flexible bandwidth options, scalability, and the connectivity businesses need to support mission critical applications. DIA is delivered over our robust, fault-tolerant network which has built-in resiliency for maximum uptime and reliability. We guarantee you'll stay connected and we back our commitment with an industry-leading Service Level Agreement. With over 490 connected buildings and a network that spans over 735 route kilometers, ENMAX Envision's DIA service is widely available throughout Calgary at an affordable price.

When downtime is not an option choose ENMAX Envision's Dedicated Internet Access

Features

- Full duplex, symmetrical 10, 100 & 1000 Mbps Ethernet access speeds
- Pure fibre-optic, next generation network with extensive reach in Calgary
- Fault-tolerant transport backbone with multiple BGP-enabled upstream Internet connections
- Entrance/route diversity – provisioned in a concrete conduit separate from ILEC entrance
- 15 day guaranteed installation for network ready locations
- 100% Core Network Availability back by a Service Level Agreements with hassle-free credits
- Flexible usage packages, monthly usage reports, and subrates available in various increments

Why DIA?

- Ensures mission-critical applications have the bandwidth required to operate effectively
- Reduces the time it takes your customers and suppliers to access your company and product information
- Increases productivity by enabling extremely fast downloads and uploads of large data files and application sharing
- Gets you up and running in no time! Quick installation and easy/affordable upgrades to your bandwidth should you need it down the road.
- Reliable, secure connection provides 'peace of mind'
- Saves you time and money

Like all of our products and services, DIA comes with: 24/7 network monitoring and support, direct customer access to network specialists through our local Network Operations Centre (NOC), 24 hour turn-around on quotes, and our relentless commitment to providing you with the most responsive service in Calgary.
