

ENMAX Corporation

2017 | Q3 INTERIM REPORT ENMAX Corporation |

CAUTION TO READER

This document contains statements about future events and financial and operating results of ENMAX Corporation and its subsidiaries (ENMAX or the Corporation) that are forward-looking. By their nature, forward-looking statements require the Corporation to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. Readers are cautioned not to place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from financial and operating targets, expectations, estimates or intentions expressed in the forward-looking statements.

When used in this Financial Report, the words “may,” “would,” “could,” “will,” “intend,” “plan,” “anticipate,” “believe,” “seek,” “propose,” “estimate,” “expect” and similar expressions, as they relate to the Corporation or an affiliate of the Corporation, are intended to identify forward-looking statements. Such statements reflect the Corporation’s current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause the Corporation’s actual results, performance or achievements to vary from those described in this Financial Report. Should one or more of these risks or uncertainties materialize, or should assumptions underlying forward-looking statements prove incorrect, actual results may vary materially from those described in this Financial Report. Intended, planned, anticipated, believed, estimated or expected and other forward-looking statements included in this Financial Report herein should not be unduly relied upon. These statements speak only as of the date of this Financial Report. The Corporation does not intend, and does not assume any obligation, to update these forward-looking statements except as required by law, and reserves the right to change, at any time at its sole discretion, the practice of updating annual targets and guidance.

BUSINESS OVERVIEW

ENMAX is a wholly owned subsidiary of The City of Calgary (The City), headquartered in Calgary, Alberta, Canada. ENMAX's vision is to be Canada's leader in the electricity industry through its mission of powering the potential of people, businesses and communities by safely and responsibly providing electricity and energy services in a way that matters to them now and in the future. ENMAX has a proud history of providing Albertans with electricity for over 100 years and continues to explore ways to improve the province's electricity system and provide progressive solutions for its customers.

ENMAX's core operations include the competitive generation and sale of electricity across Alberta through an operating segment named ENMAX Competitive Energy, and the regulated transmission and distribution of electricity within Calgary through an operating segment named ENMAX Power Delivery:

- ENMAX Competitive Energy carries out competitive energy supply and retail functions through various legal entities and affiliated companies. The ENMAX Competitive Energy integrated strategy is to provide customers with competitive energy products and services with a focus on longer-term fixed electricity contracts. These contracts link customer demand to ENMAX Competitive Energy's generating assets. Further, Competitive Energy manages risks and optimizes margin on market opportunities by managing dispatch, fuel supply, and market position. In the short term, this strategy typically results in relatively stable margins, even during times of volatile or low wholesale electricity prices. In the longer term, persistent low power prices will likely negatively impact revenues as longer-term fixed electricity contracts expire and are renewed at lower prices.
- ENMAX Power Delivery owns and operates electricity transmission and distribution assets in the Calgary service area. The segment also has the legislated responsibility to provide electricity for customers who have not entered into a contract with a competitive electricity retailer through the Calgary Regulated Rate Option (RRO). ENMAX Power Delivery's objective is to safely and efficiently maintain the high reliability of its transmission and distribution system while meeting Calgary's infrastructure needs. In addition to safe, reliable delivery; cost and capital management are key priorities. Other priorities include minimizing regulatory earnings lag and updating critical technology as a platform for future initiatives. The regulated business segment, somewhat insulated from the economic climate of Alberta, provides a stable and predictable earnings base for ENMAX. The need to replace aging infrastructure will require additional investment in the business.

ENMAX Corporate, both directly or indirectly through its subsidiaries, provides shared services and financing to ENMAX Competitive Energy and ENMAX Power Delivery.

MARKET CONDITIONS

The 2017 economic outlook report published by the Government of Alberta, forecasts a modest recovery in the economy. The Government of Alberta's electricity market and related climate reforms announced in 2015 and 2016 are in various stages of implementation and, in some cases, material components are not yet available. This uncertain environment remains a significant challenge for ENMAX and other industry participants. However, the Corporation's vertically integrated business model, which includes making, moving and marketing electricity, continues to position it well in this challenging environment.

OVERALL FINANCIAL PERFORMANCE

The table below presents ENMAX's Adjusted EBITDA, Adjusted EBIT and Comparable Net Earnings that are normalized for impairment, onerous liability charges for long term contracts, and unrealized gains (losses) on commodities where settlement on derivatives will occur in a future period. Management believes that a measure of operating performance is more meaningful if results not related to normal operations such as impairment, onerous provision charges on long term contracts, and unrealized gains and losses on commodities are excluded from the adjusted financial information. Refer to the Non-IFRS Financial Measures section for definition of the financial measures and further description.

SELECTED CONSOLIDATED FINANCIAL INFORMATION

<i>(millions of dollars)</i>	THREE MONTHS ENDED SEPTEMBER 30		NINE MONTHS ENDED SEPTEMBER 30	
	2017	2016	2017	2016
Total Revenue	698.8	670.2	2,191.5	2,077.8
Adjusted EBITDA ⁽¹⁾	93.6	116.6	287.9	344.5
Adjusted EBIT ⁽¹⁾	38.7	63.9	123.6	183.9
Comparable Net Earnings ⁽¹⁾	23.9	41.3	82.9	127.4
Net (Loss) Earnings	(20.4)	27.9	(23.8)	30.0

⁽¹⁾ Non-IFRS financial measures. See discussion that follows in Non-IFRS Financial Measures section.

ENMAX's Net (Loss) Earnings decreased by \$48.3 million for the three months ended September 30, 2017 and \$53.8 million for the nine months ended September 30, 2017, as compared with same periods in the prior year. In the current period, there were two events not typical to normal operations that impacted the financial results of the three and nine months ended September 30, 2017. The Corporation recognized an impairment charge of \$10.3 million associated with property, plant and equipment (work in progress) that it no longer expects to complete due to market conditions. During the same period, the Corporation increased its onerous provision by \$16.8 million to reflect changes in circumstances associated with the expected timing and amounts of certain longer term onerous contracts.

In the prior period, two events which were not associated with normal operations impacted the financial results of the three and nine months ended September 30, 2016, as previously reported. First, there was a \$51.4 million impairment charge on the carrying value of the Keephills PPA as a result of the termination of the PPA effective May 5, 2016 and a net \$46.0 million increase in the income tax provision mainly driven by the de-recognition of deferred tax assets, partially offset by the reversal of a provision related to tax litigation.

ENMAX's unrealized losses on commodities (net of tax) for the three and nine months ended September 30, 2017 were \$17.2 million and \$79.6 million respectively.

Adjusting for these events not related to normal operations as well as the unrealized losses on commodities, ENMAX's Comparable Net Earnings for the three and nine months ended September 30, 2017 decreased by \$17.4 million and \$44.5 million from the same periods in the prior year.

ENMAX's Adjusted EBIT decreased by \$25.2 million for the three months ended September 30, 2017 and \$60.3 million for the nine months ended September 30, 2017, as compared with same periods in the prior year. The primary drivers for the change in Adjusted EBIT were as follows:

- ENMAX Competitive Energy – Excess market supply, combined with the effect of low pool prices on retail pricing and customer product preferences, led to reduced electricity margins. These impacts were minimized through the Competitive Energy segment's integrated business model and its flexible generation portfolio cost base. Lower supply costs partially offset the effect of the declining market price on the electricity margins, as some generation was replaced with lower cost market supply. Furthermore, margins on natural gas products and contractual services also partially offset the decrease in electricity margins from the comparative prior periods.
- ENMAX Power Delivery – The regulated business continued to grow through a steady increase in investment and customer sites, largely a result of Calgary's growth and the need to replace aging infrastructure. Power Delivery is pursuing its regulatory strategy to minimize regulatory earnings lag. The increase in regulatory margins in 2017 reflected the interim Capital Tracker and interim Performance-based Regulation (PBR) adjustment decisions, both of which were received in December 2016 and apply to Distribution Access Service (DAS) rates. The regulatory margin increase was offset by a modest increase in operations, maintenance and administration (OM&A) costs and an increase in depreciation.
- ENMAX Corporate – The Corporate operation provided an overall negative impact to earnings due to an increase in system costs related to continuation of the non-capital IT Software as a Service (SaaS) project started during 2016. The Corporation expects process and cost efficiencies from these critical technology initiatives.

Additional details on the financial performance of the Corporation are discussed in the ENMAX Financial Results section.

Results of operations are not necessarily indicative of future performance due to factors including fluctuating commodity prices, timing of receipt of regulatory decisions, the performance and retirement of existing generation facilities, the addition of new generation facilities and the impact of government policies.

ENMAX COMPETITIVE ENERGY BUSINESS AND UPDATE

ENMAX Competitive Energy's core strategy is to profitably grow its customer base across Alberta and invest in power generation facilities and other strategies required to serve its electricity customers. ENMAX Competitive Energy supplies electricity through its own wind and natural gas-fuelled generation facilities. Energy portfolio requirements are balanced through the purchase and sale of electricity and natural gas from and into Alberta wholesale markets. ENMAX Competitive Energy provides customers with competitive energy products and services with a focus on longer-term electricity and natural gas contracts. Electricity contracts link customer demand to ENMAX Competitive Energy's generating assets, which results in relatively stable margins, even during times of volatile or low wholesale electricity prices. Natural gas retail contracts are backed by market transactions to provide supply certainty while also providing margin stability and risk mitigation.

As at September 30, 2017, ENMAX Competitive Energy's capacity ownership interest was 1,614 megawatts (MW) of electricity generation to supply customer demands. The remaining power and natural gas required to meet ENMAX Competitive Energy's consumer electricity and natural gas demand is acquired through the competitive wholesale power and natural gas markets. During times when ENMAX Competitive Energy has excess generation capacity, it can sell the energy to the market; whereas, when it requires power to meet its retail or wholesale customer needs, it is achieved through a combination of generation capacity and/or purchases of energy from the market. These decisions are made based on market conditions.

PPA Termination Update

The Battle River 5 PPA and the Keephills PPA were terminated effective January 1, 2016, and May 5, 2016, respectively.

On July 25, 2016, the Attorney General of Alberta filed an application with the Court of Queen's Bench seeking (1) judicial review of the Balancing Pool's decision to accept the Battle River 5 PPA termination, and (2) declaratory relief regarding the validity and interpretation of certain terms within the PPAs and related regulations (Alberta Application). ENMAX PPA Management Inc., an affiliate of ENMAX, is a named respondent in the Alberta Application.

On July 14, 2017, the Corporation filed an action and application against the Balancing Pool seeking, among other things, assistance from the Court to compel the Balancing Pool to complete and communicate to ENMAX the results of its assessment and verification process for the Keephills PPA termination. The Corporation believes that the failure of the Balancing Pool to do so is contrary to the Balancing Pool's clear statutory obligations. The Corporation is awaiting a decision from the Court of Queen's Bench on an interim injunction that was heard September 26, 2017.

On October 11, 2017, the Court of Queen's Bench issued a decision confirming the effective date of the Battle River 5 PPA termination was January 1, 2016.

KEY BUSINESS STATISTICS

	THREE MONTHS ENDED		NINE MONTHS ENDED	
	SEPTEMBER 30		SEPTEMBER 30	
	2017	2016	2017	2016
Plant availability (%) ⁽¹⁾	97.29	98.71	97.72	91.96
Average flat pool price (\$/MWh)	24.55	17.94	22.06	17.00
Spark spread (\$)	14.31	1.39	5.69	3.78

⁽¹⁾ Plant availability includes planned maintenance and forced outages.

Plant availability for the three months ended September 30, 2017 was slightly lower than same period in 2016, but improved for the nine months ended September 30, 2017. Planned outage events at the Shepard Energy Centre (Shepard) facility in the third quarter were responsible for lower plant availability in the quarter compared to 2016.

For the three and nine months ended September 30, 2017, the average power pool price increased from 2016 levels for the comparative periods. This was primarily due to higher natural gas prices and slightly higher system load.

Spark spread, which represents the notional gross margin contribution of a gas-fuelled power plant from generating a unit of electricity, improved from 2016 levels. This increase was driven by the combined effect of increased average flat pool prices of \$24.55/MWh (2016 - \$17.94/MWh) and lower average natural gas prices of \$1.36/Gigajoule (2016 - \$2.21/Gigajoule) for the three months ended September 30, 2017. For the nine months ended September 30, 2017, the improved spark spread was due to increased average flat pool prices of \$22.06/MWh (2016 - \$17.00/MWh), partially offset by higher natural gas prices of \$2.18/Gigajoule (2016 - \$1.76/Gigajoule).

ENMAX POWER DELIVERY BUSINESS AND UPDATE

ENMAX Power Delivery's highest priority is providing safe, reliable and efficient delivery of electricity to Calgarians.

ENMAX Power Delivery continues to invest in its electricity transmission and distribution system infrastructure to meet Calgary's growing needs. This includes expansion of the distribution system, reinforcement of the transmission system and replacement of aging infrastructure in both systems. Distribution projects include investments in system infrastructure to accommodate residential, commercial and industrial growth, as well as the replacement and modification of existing assets required to meet industry safety and reliability standards. Transmission projects include capacity upgrades to existing substations, new substations and transmission lines to deliver reliable electricity to meet Calgary's growing demand.

ENMAX Power Delivery submits applications to the Alberta Utilities Commission (AUC) to request approval of the need to construct or replace utility-related facilities, to set rates, and to allocate costs related to the operation of providing electric energy-delivery related services to Calgarians, among other things.

- In September 2016, ENMAX Power Delivery filed a Capital Tracker Application seeking approval for a 2015-2017 distribution capital program that will recover capital-related costs (interest, depreciation and return) on distribution capital for 2015-2017. ENMAX Power Delivery, the Office of the Utilities Consumer Advocate and the Consumers' Coalition of Alberta filed a negotiated settlement on August 28, 2017, requesting approval of capital tracker amounts of \$6.5 million, \$10.5 million and \$22.9 million for 2015, 2016 and 2017, respectively. A Commission decision on the negotiated settlement is pending.
- On November 30, 2016, ENMAX Power Delivery filed an application requesting approval of a 37.0 per cent deemed equity ratio for its distribution and transmission functions. An AUC decision was received on July 27, 2017 reducing the deemed equity ratio to 36.0 per cent for 2016 and 2017 on a final basis. The impact of this decision is approximately \$2.5 million combined for both 2016 and 2017 and will be recorded in the latter part of 2017.
- On December 9, 2016, ENMAX Power Delivery filed an application with the AUC seeking approval of Transmission Revenue Requirements of \$75.2 million and \$81.9 million for 2016 and 2017, respectively. A decision from the AUC is expected in 2017.
- On April 21, 2017, ENMAX Power Delivery filed an application for a notional 2017 revenue requirement of \$224.1 million that will serve as the basis for going-in DAS rates for the 2018-2022 PBR term. A decision on this application is expected to be issued by the end of 2017 or early 2018.
- On December 22, 2016, the AUC released a decision approving ENMAX Power Delivery's 2017 interim DAS rates application as filed. These rates were approved on an interim basis with an effective date of January 1, 2017, which provides \$226.4 million in revenue for 2017.
- On July 5, 2017, the AUC initiated the 2018 Generic Cost of Capital proceeding. The proceeding will establish ENMAX Power Delivery's allowed Return on Equity ("ROE") and approved deemed equity ratios for the years 2018, 2019 and 2020. An oral hearing will be held in Calgary commencing March 6, 2018.

ENMAX Power Delivery's continued efforts to reduce regulatory lag, promote cost efficiencies and focus on prudent capital expenditures are expected to provide a solid basis for current and future earnings.

KEY BUSINESS STATISTICS

	THREE MONTHS ENDED SEPTEMBER 30		NINE MONTHS ENDED SEPTEMBER 30	
	2017	2016	2017	2016
Distribution volumes (GWh)	2,385	2,306	7,055	6,919
System average interruption duration index (SAIDI) ⁽¹⁾			0.54	0.51
System average interruption frequency index (SAIFI) ⁽²⁾			0.37	0.32

⁽¹⁾ SAIDI equals the total duration of a sustained interruption per average customer during a predefined period of time. A sustained interruption has a duration greater than or equal to one minute. The lower the SAIDI, the better the reliability.

⁽²⁾ SAIFI equals how often the average customer experiences a sustained interruption over a predefined period of time. A sustained interruption has a duration greater than or equal to one minute. The lower the SAIFI, the better the reliability.

Total electricity delivered in gigawatt hours (GWh) in the Calgary service area for the three and nine months ended September 30, 2017 was slightly higher than the same periods in 2016. An increase in number of customer sites also resulted in an increased distribution volume in 2017.

ENMAX has consistently been one of the most reliable transmission and distribution utilities in Canada for many years. Both SAIDI and SAIFI results for the nine month period ended September 30, 2017, were marginally weaker than the same period in the prior year. This was due to a slight increase in adverse weather, defective equipment and planned outages, which tend to be relatively longer in duration.

LIQUIDITY

ENMAX actively monitors its cash position and anticipated flows to achieve adequate funding levels. The Corporation also communicates its capital position regularly with credit rating agencies and the investment community. ENMAX finances working capital requirements, capital investments and any maturities of long-term debt through a combination of cash flow from operations, commercial paper and new long-term debt.

ENMAX's total debt balance at September 30, 2017 was \$1,605.6 million (December 31, 2016 - \$1,647.2 million) of which \$nil (December 31, 2016 - \$nil) is in commercial paper. Within the next 12 months, \$300.0 million of private debentures will mature. ENMAX expects to refinance this obligation prior to the maturity date.

Currently, ENMAX has access to \$850.0 million (December 31, 2016 - \$850.0 million) in credit facilities, of which \$240.3 million (December 31, 2016 - \$244.6 million) has been drawn upon. These credit facilities mature between 2020 and 2021 and are provided by International, National and Regional lenders.

When prudent, ENMAX invests temporary surplus cash balances in short-term interest-bearing instruments in order to maximize investment income to be used to fund future operating and maintenance costs.

INCOME TAX

As disclosed in the 2016 annual consolidated financial statements, when Alberta Finance conducted its 2006 audit of ENMAX Energy Corporation and ENMAX PSA Corporation, it disagreed with the interest expense deducted on the payment in lieu of tax regulation (PILOT) returns. On June 17, 2016, the Court of Queen's Bench of Alberta issued its decision in favour of ENMAX, which resulted in Alberta Finance appealing to the Alberta Court of Appeal. The matter was heard before the Alberta Court of Appeal on October 12, 2017. The Court reserved its decision and management has not changed its assessment of the situation, no provisions have been recognized.

ENMAX FINANCIAL RESULTS

ADJUSTED EARNINGS BEFORE INTEREST AND INCOME TAXES (ADJUSTED EBIT) COMPARED WITH THE SAME PERIOD IN 2016

For the three months ended September 30, <i>(millions of dollars)</i>	ENMAX Competitive Energy	ENMAX Power Delivery	ENMAX Corporate	Consolidated
Adjusted EBIT ⁽¹⁾ for the three months ended September 30, 2016	36.3	26.1	1.5	63.9
Increased (decreased) margins attributable to:				
Electricity	(23.7)	(0.6)	0.2	(24.1)
Natural gas	0.7	-	(0.1)	0.6
Transmission and distribution	-	4.3	-	4.3
Contractual services and other	8.1	0.7	(2.1)	6.7
Decreased (increased) expenses:				
Operation, maintenance & administration ⁽²⁾	-	(0.8)	(0.6)	(1.4)
Foreign exchange (FX)	(9.1)	-	-	(9.1)
Amortization	(0.2)	(1.8)	(0.2)	(2.2)
Adjusted EBIT⁽¹⁾ for the three months ended September 30, 2017	12.1	27.9	(1.3)	38.7

⁽¹⁾ Adjusted EBIT is a non-IFRS measure. See Non-IFRS Financial Measures section.

⁽²⁾ Normalized to exclude impact of intercompany transactions with no consolidated impact.

For the nine months ended September 30, <i>(millions of dollars)</i>	ENMAX Competitive Energy	ENMAX Power Delivery	ENMAX Corporate	Consolidated
Adjusted EBIT ⁽¹⁾ for the nine months ended September 30, 2016	110.5	70.2	3.2	183.9
Increased (decreased) margins attributable to:				
Electricity	(63.0)	(0.7)	1.4	(62.3)
Natural gas	4.4	-	(0.5)	3.9
Transmission and distribution	-	11.6	-	11.6
Contractual services and other	9.1	3.2	(3.2)	9.1
Decreased (increased) expenses:				
Operation, maintenance & administration ⁽²⁾	0.9	(6.3)	(2.2)	(7.6)
Foreign exchange (FX)	(11.7)	-	0.4	(11.3)
Amortization	2.3	(5.2)	(0.8)	(3.7)
Adjusted EBIT⁽¹⁾ for the nine months ended September 30, 2017	52.5	72.9	(1.8)	123.6

⁽¹⁾ Adjusted EBIT is a non-IFRS measure. See Non-IFRS Financial Measures section.

⁽²⁾ Normalized to exclude impact of intercompany transactions with no consolidated impact.

Electricity margins for the three and nine months ended September 30, 2017, decreased \$24.1 million or 23.6 per cent, and \$62.3 million or 20.4 per cent compared to the same periods in 2016. The decrease was primarily driven by reduced margins in retail products due to lower pool prices which impacted pricing and customer product preferences. Increased gas prices and hedging costs have led to increased portfolio supply costs, further minimizing margins.

Natural gas margins for the three and nine months ended September 30, 2017, increased \$0.6 million or 8.1 per cent and \$3.9 million or 12.0 per cent compared to the same periods in 2016. The increase was primarily due to higher retail consumption volumes as a result of increased site acquisitions.

For the three and nine months ended September 30, 2017, transmission and distribution margins increased \$4.3 million or 6.3 per cent and \$11.6 million or 5.7 per cent compared to the same periods in 2016. The favorable margin was largely due to interim Capital Tracker and interim PBR rate adjustment decisions received in December 2016 for DAS.

For the three months ended September 30, 2017, contractual services and other margins increased \$6.7 million or 39.2 per cent, and in the nine months ended September 30, 2017, increased \$9.1 million or 15.1 per cent compared to the same periods in 2016. The favourable variance in the third quarter was primarily due to the receipt of \$5.5M of interest on a tax refund. The year-to-date stronger margin was also favourably impacted by gains from sales of emissions offsets and a greater proportion of higher margin contracts in the first quarter.

OM&A for the three and nine months ended September 30, 2017 increased \$1.4 million or 1.7 per cent and \$7.6 million or 3.0 per cent compared to the same periods in 2016. The slight increase in the third quarter was due to higher salary costs and increased maintenance projects performed in the quarter. The higher unfavorable variance for the nine months was primarily due to higher IT project costs, salaries and increased maintenance costs.

For the three and nine months ended September 30, 2017, net foreign exchange losses of \$9.1 million and \$11.3 million were recognized, compared to gains of \$2.0 million and \$1.1 million for the same periods in 2016. Foreign exchange gains or losses were primarily the result of marking to market the long-term service agreements denominated in U.S. currencies, as well as associated U.S. exchange forward contracts. The exchange rate of the Canadian dollar relative to the U.S. dollar strengthened significantly in 2017, resulting in net unrealized losses in both periods.

Amortization expense increased \$2.2 million or 4.2 per cent and \$3.7 million or 2.3 per cent compared to the three and nine months ended September 30, 2016. The net increase in expense was consistent with an increase in regulatory assets of \$189.3 million in 2017 which was partially offset by a reduction in PPA amortization.

OTHER NET EARNINGS ITEMS

Finance charges decreased \$0.8 million or 4.3 per cent and \$3.5 million or 6.1 per cent compared to the three and nine month periods in 2016. This was due to lower levels of long-term debt.

For the three and nine months ended September 30, 2017, unrealized losses on commodity derivatives of \$23.6 million and \$109.1 million were recognized, compared to unrealized gains of \$18.3 million and \$nil million for the same periods in 2016. These unrealized losses (gains) relate to the fair value revaluation of derivatives used as economic hedges for the costs of electricity. The unfavorable variances for the periods were primarily related to a decrease in long-term forward prices on natural gas and power contracts. These derivatives are expected to settle in the second half of 2017 through 2024. The mark-to-market adjustments do not consider the impact of any interrelationship among the factors such as the underlying position and the optionality of the Corporation's integrated business. The generation capacity or future sales to customers are not mark-to-market, which creates a mismatch in the timing of earnings.

OTHER COMPREHENSIVE INCOME

Other comprehensive income (OCI) presents earnings under the assumption of full income recognition of gains and losses on the market value of securities and derivatives otherwise treated as hedges of future period revenues and expenses.

For the three and nine months ended September 30, 2017, OCI had total gains (net of tax), of \$2.6 million and \$41.3 million respectively, compared with losses of \$65.4 million and \$45.9 million for the same periods in 2016. The OCI gains reflected the favorable fair value changes in commodity positions where hedge accounting is applied.

NON-IFRS FINANCIAL MEASURES

The Corporation uses Adjusted EBITDA, Adjusted EBIT, Comparable Net Earnings, and funds from operations (FFO) as financial performance measures. These measures do not have any standard meaning prescribed by IFRS and may not be comparable to similar measures presented by other companies. The purpose of these financial measures and their reconciliation to IFRS financial measures are shown below. These non-IFRS measures are consistently applied in the previous period, except where otherwise noted.

ADJUSTED EBITDA

<i>(millions of dollars)</i>	THREE MONTHS ENDED SEPTEMBER 30		NINE MONTHS ENDED SEPTEMBER 30	
	2017	2016	2017	2016
Adjusted EBITDA (non-IFRS financial measure)	93.6	116.6	287.9	344.5
Deduct:				
Depreciation and amortization	54.9	52.7	164.3	160.6
Finance charges	17.9	18.7	53.6	57.1
Income tax (recovery) expense	(3.1)	3.9	(12.9)	(0.6)
Comparable Net Earnings (non-IFRS financial measure)				
Unrealized losses (gains) on commodities	23.6	18.3	109.1	-
Income tax (recovery) expense on unrealized losses on commodities	(6.4)	(4.9)	(29.5)	-
Non-recurring tax adjustments ⁽¹⁾	-	-	-	46.0
Impairment	10.3	-	10.3	51.4
Onerous liability	16.8	-	16.8	-
Net (loss) earnings (IFRS financial measure)	(20.4)	27.9	(23.8)	30.0

⁽¹⁾ A net \$46.0 million increase in the income tax provision mainly driven by de-recognition of deferred tax assets, partially the one-time reversal of a provision related to tax litigation.

Adjusted EBITDA is a useful measure of business performance as it provides an indication of the cash flow results generated by primary business activities without consideration as to how those activities are financed and amortized, or how the results are taxed in various business jurisdictions. Adjusted EBITDA is also used to evaluate certain debt coverage ratios.

Adjusted EBITDA is normalized for impairment, onerous liability charges for long term contracts, and unrealized gains (losses) on commodities. Management believes that a measure of operating performance is more meaningful if results not related to normal operations such as impairment, onerous provision charges on long term contracts, and unrealized gains and losses on commodities are excluded from the adjusted operating profit. Unrealized gains (losses) on commodities reflect the impact of changes in forward natural gas and power prices and the volume of the positions for these derivatives over a certain period of time. These unrealized gains (losses) do not necessarily reflect the actual gains and losses that will be realized on settlement. Furthermore, unlike commodity derivatives, ENMAX's generation capacity and future sales to retail customers are not marked-to-market.

ADJUSTED EBIT

<i>(millions of dollars)</i>	THREE MONTHS ENDED SEPTEMBER 30		NINE MONTHS ENDED SEPTEMBER 30	
	2017	2016	2017	2016
Operating (loss) profit (IFRS financial measure)	(12.4)	38.6	(49.6)	131.0
Add back:				
Adjustments for rate-regulated activities	0.4	7.0	37.0	1.5
Unrealized losses (gains) on commodities	23.6	18.3	109.1	-
Impairment	10.3	-	10.3	51.4
Onerous liability	16.8	-	16.8	-
Adjusted EBIT (non-IFRS financial measure)	38.7	63.9	123.6	183.9
Deduct:				
Unrealized losses (gains) on commodities	23.6	18.3	109.1	-
Impairment	10.3	-	10.3	51.4
Onerous liability	16.8	-	16.8	-
Finance charges	17.9	18.7	53.6	57.1
Income tax (recovery) expense	(9.5)	(1.0)	(42.4)	45.4
Net (loss) earnings (IFRS financial measure)	(20.4)	27.9	(23.8)	30.0

During 2017, instead of EBIT, the Corporation is focusing on Adjusted EBIT, which excludes the impact of impairment, onerous liability charges for long term contracts and unrealized gains (losses) on commodities. Adjusted EBIT is a useful measure of business performance, which provides an indication of the operating results generated by primary business activities.

Normalizing for impairment, onerous liability charges for long term contracts and the unrealized gains (losses) on commodities provides a better representation of the underlying operations of the Corporation. Refer to Adjusted EBITDA above.

FFO

<i>(millions of dollars)</i>	THREE MONTHS ENDED SEPTEMBER 30		NINE MONTHS ENDED SEPTEMBER 30	
	2017	2016	2017	2016
Cash flow from operations (IFRS financial measure)	69.9	87.5	226.9	293.8
Changes in non-cash working capital	4.1	41.8	79.2	79.4
Post-employment benefits	1.3	(1.0)	0.4	-
Contributions in aid of construction	(11.1)	(16.6)	(48.2)	(43.8)
Funds from operations (non-IFRS financial measure)	63.1	111.7	258.2	329.4

FFO is used as an additional metric of cash flow without regard to changes in the Corporation's non-cash working capital and adjusted for contributions in aid of construction.

FINANCIAL CONDITION

SIGNIFICANT CHANGES IN THE CORPORATION'S FINANCIAL CONDITION

As at (millions of dollars, except % change)	September 30, 2017	December 31, 2016	\$ Change	% Change	Explanation for Change
ASSETS					
Cash and cash equivalents	23.8	117.5	(93.7)	(80%)	Primarily due to cash used for purchase of property, plant and equipment, repayment of long-term debt and dividend payment, which more than offset the net proceeds received from short-term debt and cash from operating activities.
Accounts receivable	493.7	507.4	(13.7)	(3%)	Decrease due to timing of receipts, decreased electricity sales on commercial fixed-price contracts.
Property, plant and equipment (PPE)	4,111.9	4,071.4	40.5	1%	General capital additions partially offset by amortization.
LIABILITIES AND SHAREHOLDER'S EQUITY					
Accounts payable	331.5	376.5	(45.0)	(12%)	Decrease mainly attributable to lower gas volumes and lower capital accruals.
Dividend payable	12.0	-	12.0	100%	Dividend declared in March, payable in equal instalments during the year.
Financial liabilities ⁽¹⁾	127.8	75.0	52.8	70%	Change in fair value of hedged and non-hedged derivatives.
Long-term debt ⁽¹⁾	1,605.6	1,647.2	(41.6)	(3%)	Primarily due to repayment of long-term debt.

⁽¹⁾ Net current and long-term asset and liability positions.

FUTURE ACCOUNTING CHANGE

The International Accounting Standards Board (IASB) issued new standards and amendments to existing standards that were not yet effective as of September 30, 2017 but are effective for January 1, 2018 and 2019. Please refer to Note 3 of the condensed consolidated interim financial statements for a list of the upcoming accounting changes.

⁽¹⁾ Total interest paid during the three and nine months ended September 30, 2017 were \$2.8 million and \$39.6 million, respectively (2016 - \$2.7 million and \$40.8 million). Purchase of property, plant and equipment and intangibles includes capitalized borrowing costs of \$2.0 million and \$5.2 million for the three and nine months ended September 30, 2017 respectively (2016 - \$1.2 million and \$3.1 million).

⁽²⁾ Cash and cash equivalents include restricted cash of \$7.9 million (2016 - \$7.2 million) posted with a financial institution relating to margin. This margin is required as part of the Corporation's commodity trading activity.

See accompanying Notes to Condensed Consolidated Interim Financial Statements.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. DESCRIPTION OF THE BUSINESS

ENMAX Corporation (ENMAX or the Corporation), a wholly owned subsidiary of The City of Calgary (The City), was incorporated under the *Business Corporations Act* (Alberta) in July 1997 to carry on the electric utility transmission and distribution operations previously carried on by the Calgary Electric System (CES), a former department of The City. Operations of the Corporation began on January 1, 1998, with the transfer of substantially all of the assets and liabilities of the CES by The City into the Corporation at net book value, for consideration of one common share issued to The City. Since 1998, the Corporation has grown from its transmission and distribution roots to include electricity generation, commercial and residential solar, electricity and natural gas retail businesses.

The Corporation's registered and head office is at 141 - 50 Avenue SE, Calgary AB, T2G 4S7. The Corporation's principal place of business is Alberta.

2. BASIS OF PREPARATION

These condensed consolidated interim financial statements have been prepared by management in accordance with International Accounting Standards (IAS) 34, Interim Financial Reporting. These condensed consolidated interim financial statements have been prepared following the same accounting policies and methods as those used in preparing the most recent consolidated financial statements for the year ended December 31, 2016, and have been prepared under the historical costs basis, except for the revaluation of financial derivative instruments to fair value and to reflect asset impairment (if any). The financial statements do not include all disclosure required for the preparation of annual audited financial statements. Accordingly, the financial statements should be read in conjunction with the 2016 annual consolidated financial statements prepared in accordance with International Financial Reporting Standards (IFRS), which are available on ENMAX's website at www.enmax.com.

These condensed consolidated interim financial statements were authorized for issuance by the Board of Directors on November 17, 2017.

3. ACCOUNTING PRONOUNCEMENTS NOT YET ADOPTED

The following standards and interpretations are not yet effective and have not been applied in preparing these condensed consolidated interim financial statements.

IFRS 9 *Financial Instruments*

The final standard replaces IAS 39 *Financial Instruments: Recognition and Measurement* and previous versions of IFRS 9. The entire standard provides guidance and requirements on classification and measurement of financial assets and liabilities, impairment and hedging. The standard has introduced a single expected credit loss model for all financial assets measured at amortized cost and fair value through other comprehensive income (OCI). The standard is effective for annual periods beginning on or after January 1, 2018. The Corporation is progressing on its implementation plan for IFRS 9 and is on track for full implementation effective January 1, 2018.

IFRS 15 Revenue from Contracts with Customers

The new standard provides a framework that replaces existing revenue recognition guidance. Entities will apply a five-step model to determine when to recognize revenue and at what amount. The model specifies that revenue should be recognized when (or as) an entity transfers control of goods or services to a customer at the amount to which the entity expects to be entitled. The standard is effective for annual periods beginning on or after January 1, 2018. The Corporation is progressing on its implementation plan for IFRS 15 and is on track for full implementation effective January 1, 2018.

IFRS 16 Leases

The new leases standard requires companies to bring most leases on-balance sheet and eliminates the distinction between operating and finance leases. Lessor accounting remains mostly unchanged from previous guidance. The key objective of the new standard is to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The standard is effective January 1, 2019. Early application is permitted for companies that also apply IFRS 15 Revenue from Contracts with Customers. The Corporation is currently assessing the impact of adopting this standard and plans to fully implement it effective January 1, 2019.

4. SEGMENT INFORMATION

The Corporation operates in two segments representing separately managed business units, each of which offers different products and services.

The Corporation uses a shared service allocation model to allocate cost between segments.

ENMAX COMPETITIVE ENERGY

ENMAX Competitive Energy is an operating segment established to carry out competitive energy supply and retail functions through various legal entities and affiliated companies. ENMAX Competitive Energy also includes ENMAX Power Services and ENCOMPASS Customer Care.

ENMAX POWER DELIVERY

ENMAX Power Delivery is a regulated operating segment established to carry out electricity transmission and distribution service functions and the Regulated Rate Option (RRO) retail function through various legal entities and affiliated companies.

SEGMENTED TOTAL ASSETS AND REGULATORY DEFERRAL ACCOUNT BALANCES

<i>As at</i>	September 30,	December 31,
<i>(millions of Canadian dollars)</i>	2017	2016
ENMAX Competitive Energy	2,710.7	2,901.5
ENMAX Power Delivery	2,411.3	2,268.9
Corporate and Intersegment Eliminations	79.2	155.3
Total Assets	5,201.2	5,325.7
Regulatory Deferral Account Debit Balances	68.4	39.8
Total Assets and Regulatory Deferral Account Debit Balances	5,269.6	5,365.5

COMPARATIVE SEGMENT INFORMATION

Segment information reflects the presentation regularly reviewed by the chief operating decision maker. Management believes that a measure of operating performance is more meaningful if results not related to normal operations such as impairment, onerous provision charges on long term contracts, and unrealized gains and losses on commodities are excluded from the adjusted operating profit. Unrealized gains and losses on commodities reflect the impact of changes in forward natural gas and power prices and the volume of the positions for these derivatives over a certain period of time. Unrealized gains and losses on commodities do not necessarily reflect the actual gains and losses that will be realized on settlement. As a result, the Corporation does not consider them reflective of underlying operations for the period presented.

Segment information for the three and nine months ended September 30, 2016, has been reclassified to conform with the current year's presentation. The presentation change had no impact on reported consolidated net earnings.

THREE MONTHS ENDED SEPTEMBER 30, 2017

** During the nine months ended September 30, 2016, the ENMAX Competitive Energy segment recognized an impairment of \$51.4 million as a result of the decision to terminate the Keephills purchase power arrangement (PPA) on May 5, 2016.

5. FINANCIAL INSTRUMENTS, HEDGES AND RISK MANAGEMENT MARKET RISK

The Corporation manages its exposure to market risk (interest rate risk, foreign currency exchange risk, commodity price risk and equity price risk) on a portfolio basis. This includes managing its positions arising from its interests in generation facilities, liability positions arising from its commitments to its customers and transacting positions arising from its hedging activities.

VALUATION OF DERIVATIVE ASSETS AND LIABILITIES

Financial derivative instruments are recorded at fair value on the statement of financial position. As at September 30, 2017, the fair values of derivatives were as follows:

<i>(millions of Canadian dollars)</i>	September 30, 2017		December 31, 2016	
	Hedge Instruments	Non-Hedge Derivatives	Hedge Instruments	Non-Hedge Derivatives
Assets				
Current	19.0	31.4	27.6	68.5
Non-current	28.9	10.8	36.5	18.6
Liabilities				
Current	42.2	62.0	61.7	42.5
Non-current	51.8	61.9	103.4	18.6

For cash flow hedges, gains and losses are reclassified immediately to net earnings when anticipated hedged transactions are no longer likely to occur. During Q4 2016, the Corporation voluntarily de-designated a portion of its cash flow hedges. At the time of de-designation, the accumulated gain in OCI was \$8.8 million and is currently being reclassified to net earnings in the same period as the anticipated hedge transactions settle or when deemed ineffective. In the three and nine months ended September 30, 2017, there was a \$nil and \$3.3 million (2016—\$nil and \$nil) impact recognized in electricity and fuel purchases due to the ineffectiveness of the relevant hedges.

For non-hedge derivatives, there were unrealized losses of \$14.9 million and \$107.7 million in the three and nine months ended September 30, 2017, respectively (2016 gains of \$16.9 million and \$4.8 million), primarily recorded in electricity and fuel purchases. The anticipated non-hedge derivatives are expected to settle in the last quarter of 2017 through 2024. The mark-to-market adjustments do not consider the impact of any interrelationship among the factors such as the underlying position and the optionality of the Corporation's integrated business. The issue is that the generation capacity or future sales to customers are not mark-to-market, which creates a mismatch in the timing of earnings.

NON-DERIVATIVE FINANCIAL ASSETS AND LIABILITIES

Fair values for cash and cash equivalents, accounts receivable, short-term debt, accounts payable and accrued liabilities are not materially different from their carrying amounts due to their short-term nature.

The Corporation estimated the fair value of its long-term debt based on quoted market prices for the same or similar debt instruments. When such information was not available, future payments of interest and principal were discounted at estimated interest rates for comparable entities.

CARRYING AMOUNTS AND FAIR VALUES OF LONG-TERM DEBT

<i>As at</i>	September 30, 2017		December 31, 2016	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
<i>(millions of Canadian dollars)</i>				
Long-term debt ⁽¹⁾ consisting of:				
Debtures, with remaining terms of:				
Less than 5 years	78.7	81.0	99.2	104.2
5–10 years	13.3	14.0	10.2	10.4

⁽²⁾ Matures June 2018, whole balance included in current portion as at September 30, 2017.

6. REGULATORY DEFERRAL ACCOUNT BALANCES

The timing of recognition of certain regulatory debits, credits, revenues and expenses may differ from what is otherwise expected under IFRS for non-regulated operations. The Corporation has recorded the following regulatory deferral account debit and credit balances:

<i>As at</i> <i>(millions of Canadian dollars)</i>	Accounts receivable (a)	Un-eliminated inter-company profit (b)	Other regulatory debits (c)	Total regulatory deferral account debit balances
Regulatory deferral account debit balances				
January 1, 2017	-	8.8	31.0	39.8

June 30, 2016	-	11.8	11.8
Balances Arising in the Period ⁽¹⁾	-	-	-
Recovery (Reversal) ⁽²⁾	-	(5.5)	(5.5)
September 30, 2016	-	6.3	6.3
Expected Recovery/Reversal Period		12 Months	

⁽¹⁾ "Balances Arising in the Period" column consists of new additions to regulatory deferral debits and credit balances.

⁽²⁾ "Recovery (Reversal)" column consists of amounts collected/refunded through rate riders or transactions reversing existing regulatory balances.

The following describes each of the circumstances in which rate regulation affects the accounting for a transaction or event. Regulatory deferral account debit balances represent costs incurred in the current period or in prior periods, which are expected to be recovered from customers in future periods through the rate-setting process. Regulatory deferral account credit balances represent future reductions or limitations of increases in revenues associated with amounts that are expected to be returned to customers as a result of the rate-setting process.

(a) Accounts receivable and payable

Accounts receivable and payable represent a price-only deferral account for transmission charges from the AESO. In the absence of rate regulation and the interim standard, IFRS would require that actual costs be recognized as an expense when incurred.

(b) Inter-company profit

A subsidiary of the Corporation performs construction work for the regulated operations of ENMAX Power Delivery at a profit. Such profit is deemed for regulatory purposes to be realized to the extent that the transfer price is recognized for rate-making purposes by the regulator and included in the capital cost of distribution assets. In the absence of rate regulation and the interim standard, IFRS would require that intercompany profits be eliminated upon consolidation.

(c) Other regulatory debits

Other regulatory debits primarily relate to the AUC flow-through items and other costs that will be collected from customers via future rates such as access service charges. The timing of the decision on collection of these items can result in significant fluctuation in balances from year to year.

(d) Other regulatory credits

Other regulatory credits primarily relate to items that will be refunded to customers through future rates.

For certain regulatory items identified above, the expected recovery or settlement period, or likelihood of recovery or settlement, is affected by risks and uncertainties and including those inherent in rate-setting regulatory processes. There is a risk that the regulator may disallow a portion of certain costs incurred in the current period for recovery through future rates or disagree with the proposed recovery period. Any impairment related to regulatory deferral account debit balances are recorded in the period in which the related regulatory decisions are received.

7. OTHER ASSETS AND LIABILITIES

<i>As at</i>	September 30,	December 31,
<i>(millions of Canadian dollars)</i>	2017	2016
Other current assets		
Prepaid expenses	13.1	10.2

	30.3	43.9
Other long-term liabilities		
Capital lease	4.3	4.6
Other	13.5	13.9
	17.8	18.5

8. INCOME TAXES

The calculation of the Corporation's current and deferred income taxes involves a degree of estimation and judgment. The carrying value of deferred income tax assets is reviewed at the end of each reporting period. For the three and nine months ended September 30, 2017, management adjusted the income tax provision utilizing its best estimate with considerations including management's expectation of future operating results, interpretation of applicable tax positions, and allowances, where uncertainty surrounding the realization of the tax benefit exists.

9. ACCUMULATED OTHER COMPREHENSIVE LOSS

<i>As at</i> (millions of Canadian dollars)	September 30, 2017	December 31, 2016
Net unrealized (losses) on derivatives designated as cash flow hedges, including deferred income tax recovery of \$8.6 million (December 31, 2016—recovery of \$22.3 million)	(37.5)	(78.5)
Net actuarial (losses) on defined benefit plans, including deferred income tax recovery of \$0.3 million (December 31, 2016—recovery of \$0.1 million)	(10.5)	(10.8)
Accumulated other comprehensive (losses), including deferred income tax recovery of \$9.5 million (December 31, 2016—recovery of \$22.4 million)	(48.0)	(89.3)

10. OTHER REVENUE AND EXPENSES

OTHER REVENUE

Provisions	15.8	(0.5)	14.3	(2.3)
Change in non-cash working capital	(4.1)	(41.8)	(79.2)	(79.4)

13. RELATED PARTY TRANSACTIONS

The City is the sole shareholder of the Corporation. The following tables summarize the related party transactions between the Corporation and The City.

Statements of earnings

<i>(millions of Canadian dollars)</i>	THREE MONTHS ENDED SEPTEMBER 30		NINE MONTHS ENDED SEPTEMBER 30	
	2017	2016	2017	2016
Revenue ⁽¹⁾	33.7	28.8	101.7	91.5
Local access fees and other expenses ⁽²⁾	24.8	24.9	77.1	72.0

⁽¹⁾ The significant components include contract sales of electricity, construction of infrastructure, provision of non-regulated power distribution services, and billing and customer care services relating to The City's utilities departments.

⁽²⁾ This cost is passed through the Corporation directly to transmission and distribution customers.

Statements of financial position

<i>As at</i>	September 30, 2017	December 31, 2016
<i>(millions of Canadian dollars)</i>		
Accounts receivable	26.6	21.6
Other long-term assets	0.8	1.3
Property, plant and equipment ⁽¹⁾	3.6	3.7
Accounts payable and accrued liabilities	10.5	9.8
Long-term debt ⁽²⁾	1,103.4	1,145.2
Other long-term liabilities ⁽³⁾	6.8	7.0

⁽¹⁾ Assets under lease.

⁽²⁾ Interest payments for the three and nine months ended September 30, 2017 were \$1.4 million (2016 - \$1.7 million) and \$23.0 million (2016 - \$24.5 million), respectively. Principal payments for the three and nine months ended September 30, 2017 were \$8.0 million (2016 - \$7.6 million) and \$41.8 million (2016 - \$40.3 million), respectively. In addition, for the three and nine months period ended of September 30, 2017, the Corporation paid management fees of \$0.7 million (2016 - \$0.7 million) and \$2.1 million (2016 - \$2.1 million), respectively to The City.

⁽³⁾ Finance lease obligation.

Transactions between the Corporation and The City have been recorded at the exchange amounts, as outlined by the contracts in effect between the Corporation and The City.

The Corporation has committed to a water supply agreement, whereby The City supplies a specified amount of water annually to facilitate Shepard Energy Centre operations.

14. COMMITMENTS AND CONTINGENCIES

POWER PURCHASE ARRANGEMENTS (PPA)

The Battle River 5 PPA and the Keephills PPA were terminated effective January 1, 2016, and May 5, 2016, respectively.

On July 25, 2016, the Attorney General of Alberta filed an application with the Court of Queen's Bench seeking (1) judicial review of the Balancing Pool's decision to accept the Battle River 5 PPA termination, and (2) declaratory relief regarding the validity and interpretation of certain terms within the PPAs and related regulations (Alberta Application). ENMAX PPA Management Inc., an affiliate of ENMAX, is a named respondent in the Alberta Application.

On July 14, 2017, the Corporation filed an action and application against the Balancing Pool seeking, among other things, assistance from the Court to compel the Balancing Pool to complete and communicate to ENMAX the results of its assessment and verification process for the Keephills PPA termination. The Corporation believes that the failure of the Balancing Pool to do so is contrary to the Balancing Pool's clear statutory obligations. The Corporation is awaiting a decision from the Court of Queen's Bench on an interim injunction that was heard September 26, 2017.

On October 11, 2017, the Court of Queen's Bench issued a decision, confirming the effective date of the Battle River 5 PPA termination was January 1, 2016.

No provisions have been recognized with respect to the above matters as the Corporation believes the terminations were exercised in accordance with the provisions of the PPAs.

INCOME TAX

As disclosed in the 2016 annual consolidated financial statements, when Alberta Finance conducted its 2006 audit of ENMAX Energy Corporation and ENMAX PSA Corporation, it disagreed with the interest expense deducted on the payment in lieu of tax regulation (PILOT) returns. On June 17, 2016, the Court of Queen's Bench of Alberta issued its decision in favour of ENMAX. Alberta Finance appealed the decision. The matter was heard before the Alberta Court of Appeal on October 12, 2017. The Court reserved its decision and management has not changed its assessment of the situation. No provisions have been recognized.

LEGAL AND REGULATORY PROCEEDINGS

In the normal course of business, the Corporation is and may be named as a defendant or party in lawsuits and regulatory proceedings related to various matters. The Corporation currently believes the outcome of these lawsuits and regulatory proceedings will not have a material impact on the operating results or financial position of the Corporation.

The Corporation, along with other market participants in the province of Alberta, is subject to decisions, market rules, regulations, regulatory proceedings and/or jurisdiction of the AUC, AESO, Market Surveillance Administrator (MSA) and other authorities. The financial impact of decisions, market rules, regulations and regulatory proceedings is reflected in the consolidated financial statements when the amount can be reasonably estimated.
