

July 2020

PROJECT UPDATE
32 AVENUE NW Transmission Line Alteration

Dear Resident/Occupant/Business Owner:

In January 2020, ENMAX Power Corporation (ENMAX) mailed out a project information package to stakeholders outlining the project scope for the proposed 32 Avenue NW Transmission Line Alteration Project (the Project).

At that time, ENMAX indicated its intent to file an application for approval with the Alberta Utilities Commission in Q1 2020. During the consultation process, ENMAX identified additional factors and considerations that are now under evaluation.

As a result, the filing date for the Project has been delayed and ENMAX is currently reviewing alternative options in addition to the original project scope. ENMAX plans to mail out updated project information packages to project-specific stakeholders that may include alternate options and details by the end of Q3 2020.

If you would like more information or if you have any questions or concerns regarding the Project, please contact ENMAX by phone or email.

- Call us at 403-514-1471
- Email us at stakeholderrelations@enmax.com
- Visit the Project website at enmax.com/32Avenue

Sincerely,

ENMAX Power Stakeholder Relations
