

PROPOSED 138 KV TRANSMISSION LINE REALIGNMENT

69 STREET SW AND GLENMORE TRAIL (HIGHWAY 8)

PROJECT OVERVIEW

Alberta Transportation continues to move forward with planning of the Southwest Calgary Ring Road. To accommodate construction of the new interchange at 69 Street SW and Glenmore Trail (Highway 8), ENMAX Power Corporation (ENMAX) is required to relocate a portion of an existing 138 kV transmission line along Glenmore Trail (Highway 8).

PROJECT DETAILS

The project requires the removal of a portion of an existing 138 kV transmission line and relocating it with a new steel monopole transmission line including:

- Removal of eight existing wooden transmission poles on an existing 138 kV line from Discovery Ridge Boulevard north and east of 69 Street SW (see map)
- Installation of eight new steel monopoles to replace existing wooden poles as outlined in the map

PROPOSED SCHEDULE

ENMAX plans to file an application with the Alberta Utilities Commission (AUC) in mid-June 2016. Subject to approvals being granted, ENMAX expects construction to begin in September 2016 with a proposed in-service date of October 2016.

JUNE 2016	ENMAX submits application to the AUC for approval
SEPTEMBER 2016	Construction begins
OCTOBER 2016	In-service date

TRANSPORTATION UTILITY CORRIDOR (TUC)

In the mid-1970s, the Government of Alberta established Restricted Development Areas (RDAs) around Calgary. The lands included in these RDAs were designated to accommodate linear transportation and utility facilities. These uses include ring roads (and associated interchanges), stormwater management facilities, petroleum pipelines, power transmission lines and municipal regional water, sanitary and storm sewer lines.

PROPOSED 138 KV TRANSMISSION LINE REALIGNMENT

69 STREET SW AND GLENMORE TRAIL (HIGHWAY 8)

TRANSMISSION STRUCTURES

The proposed single circuit transmission structures will be self-supporting steel monopoles and will have a height of 27 to 34 metres (88 to 111 feet). The current wooden poles being replaced are approximately 16 to 20 metres (52 to 65 feet) in height.

Example of Wood Pole

Example of Steel Monopole

COMMITMENT TO COMMUNITY

ENMAX is committed to being a responsible corporate neighbour in the community. This commitment includes providing timely and meaningful engagement with stakeholders about this project.

We have developed a comprehensive public involvement program to provide opportunities for area residents, occupants and landowners to be informed about this proposal and to engage with ENMAX in dialogue from the planning phase through to construction.

ABOUT ENMAX CORPORATION

ENMAX, through its subsidiaries, makes, moves and sells electricity to residential, small business and large commercial customers and is headquartered in Calgary, Alberta, with offices in Edmonton. ENMAX Power Corporation owns and operates transmission and distribution infrastructure in Calgary and ENMAX Energy Corporation owns diverse electricity generation facilities throughout the province. Since 2007, ENMAX has been named one of Alberta's Top Employers. ENMAX Energy is currently the retailer of choice for both The City of Calgary and The City of Edmonton.

MORE INFORMATION

Your input is very valuable to us. We will work with you to ensure you get answers to your questions and your concerns are understood. For more information about the proposed transmission line, please contact:
