

NOSE HILL DRIVE NW Transmission Line Alteration

PROJECT OVERVIEW

ENMAX Power Corporation (ENMAX) has been asked to alter its existing transmission line 36.81L to accommodate the extension of Nose Hill Drive NW to access a new residential development, Haskayne Phase 1. As a result, ENMAX proposes to replace three existing wood poles with three self-supporting steel monopoles (monopoles) and replace one existing wood pole with a new wood pole. The three monopoles would be replaced in an altered alignment and the wood pole would be replaced in the same location. All four of the new poles will be located within the existing transmission line right-of-way.

PROPOSED SCHEDULE

ENMAX plans to file an application with the Alberta Utilities Commission in Q4 2019 for approval of the project. Subject to approvals being granted, construction is scheduled to begin in Q2 2020 with an expected in-service date in Q2 2020.

TRANSMISSION STRUCTURES

The existing wood poles range in height from approximately 18 to 27 meters. The new poles will range in height from approximately 21 to 31 meters.
