## Transmission Line Alteration

### PROJECT OVERVIEW

ENMAX Power Corporation (ENMAX) has been directed by Alberta Transportation to alter a portion of its existing transmission line 7.84L to accommodate the construction of a portion of the West Calgary Ring Road project. In response, ENMAX is proposing to replace an existing three-pole wood structure with a three-pole wood and steel structure, construct a new three-pole wood and steel structure, and replace an existing wood pole with a new wood pole (the Project). All three structures will be within the same alignment and are located within the Transmission Utility Corridor (TUC) on the south side of the Trans-Canada Highway. Please see the map for details.

### TRANSMISSION STRUCTURES

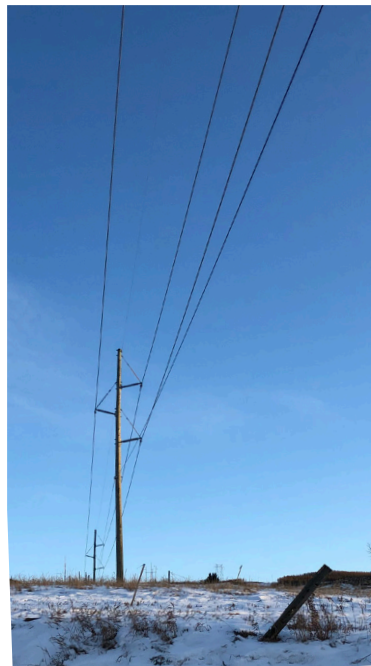

The existing structures range in height from approximately 19 to 24 metres. The proposed new structures are a combination of wood and/or steel and will range in height from approximately 13 to 23

### PROPOSED SCHEDULE

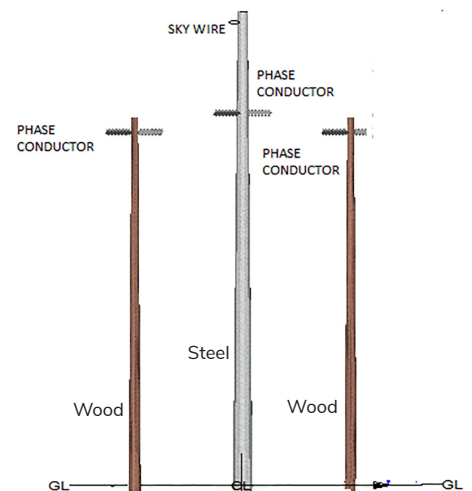

ENMAX plans to file an application for the Project with the Alberta Utilities Commission in Q2 2020. Subject to approvals being granted, construction is expected to start in Q2 2020, with an expected in-service date in Q3 2020.

### COMMITMENT TO COMMUNITY

ENMAX is committed to be a responsible corporate neighbour. Our commitment includes providing timely and meaningful engagement with stakeholders about projects.

We provide opportunities for residents, occupants and landowners to be informed about projects, and to engage with us from the planning phase through construction.

### ABOUT ENMAX CORPORATION

ENMAX Corporation, through its subsidiaries, makes, moves and sells electricity to residential, small business and large commercial customers and is headquartered in Calgary, Alberta, with offices in Edmonton. ENMAX Power Corporation owns and operates transmission and distribution infrastructure in Calgary and ENMAX Energy Corporation owns diverse electricity generation facilities throughout the province. Through its subsidiaries, ENMAX offers a range of innovative energy solutions to over 667,700 customers across Alberta including electricity, natural gas, renewable energy and other services.

### CONTACT INFORMATION

Your input is valuable to us. We will ensure you get answers to your questions and your concerns are understood. For more information about the proposed transmission line, please contact:
