

9 AVENUE SE BRIDGE

PROPOSED TRANSMISSION RELOCATION

PROJECT OVERVIEW

The City of Calgary has requested ENMAX Power Corporation (ENMAX) to relocate an existing transmission structure to accommodate the 9 Avenue SE Bridge Replacement Project. The City of Calgary has determined an existing structure is in direct conflict with the current design of the bridge expansion construction.

Relocation of the structure is required to avoid any damage to ENMAX's transmission infrastructure and ensure the delivery of safe, reliable power. ENMAX proposes to remove and salvage an existing wooden structure southeast of the 9 Avenue bridge and place a temporary wooden pole northwest of the bridge by Fort Calgary. A second wooden structure behind the Deane House will be replaced with a steel monopole. Also, guy wires will be added to a current lattice transmission structure by the CP tracks to provide additional support.

PROPOSED SCHEDULE

ENMAX plans to file an Application with the Alberta Utilities Commission (AUC) in April 2017. Construction will take approximately one week to complete and pending approval by the AUC, will commence in October 2017. Upon completion of the new 9 Avenue SE Bridge, ENMAX will remove the temporary pole and place a new pole near its current location.

TRANSMISSION STRUCTURES

The current wooden transmission structures are 20 metres in height. The new temporary wooden pole will be 24.4 metres in height and located approximately 70 metres west of its current location. The new steel monopole will be self-supporting and 25 metres in height.

COMMITMENT TO COMMUNITY

ENMAX is committed to being a responsible corporate neighbour in the community. This commitment includes providing timely and meaningful engagement with stakeholders about this project.

We have developed a comprehensive public involvement program to provide opportunities for area residents, occupants and landowners to be informed about this proposal and to engage with ENMAX in dialogue from the planning phase through to construction.

ABOUT ENMAX CORPORATION

ENMAX, through its subsidiaries, makes, moves and sells electricity to residential, small business and large commercial customers and is headquartered in Calgary, Alberta, with offices in Edmonton. ENMAX Power Corporation owns and operates transmission and distribution infrastructure in Calgary and ENMAX Energy Corporation owns diverse electricity generation facilities throughout the province. Since 2007, ENMAX has been named one of Alberta's Top Employers. ENMAX Energy is currently the retailer of choice for both The City of Calgary and The City of Edmonton.

MORE INFORMATION

Your input is very valuable to us. We will work with you to ensure you get answers to your questions and your concerns are understood. For more information about the proposed transmission line, please contact:
