

NO. 33 SUBSTATION

Transmission Line Alteration Project

PROJECT OVERVIEW

ENMAX Power Corporation (ENMAX Power) owns and operates ENMAX No. 33 Substation (No. 33 Substation) which is located at 940 Canfield Crescent SW, as well as the interconnecting overhead transmission line 33.84L (33.84L). A segment of 33.84L located within the existing substation fence-line has been determined to pose a potential safety hazard to ENMAX Power personnel during routine maintenance activities. ENMAX Power proposes to address this by altering the location of 33.84L on ENMAX Power owned property (the Project). This project will enable ongoing substation maintenance, while continuing to provide ENMAX Power customers with safe and reliable electricity.

PROJECT DESCRIPTION

Transmission line 33.84L currently enters No. 33 substation at the north side of the existing fence-line. ENMAX Power is proposing that instead of crossing the substation yard diagonally, 33.84L will run from its current alignment, along the west side of the substation yard and connect to a new steel monopole at the south end of the substation outside of the existing fence-line on ENMAX Power owned property. 33.84L will then run east along the south edge of ENMAX Power owned property where it will connect to a new steel monopole and run north to connect to the substation.

THIS PROJECT INCLUDES:

- The installation of two steel monopoles at the south end of the substation outside of the existing fence-line on ENMAX Power owned property.
- The removal of one existing wood pole within the existing fence-line.

PROPOSED SCHEDULE

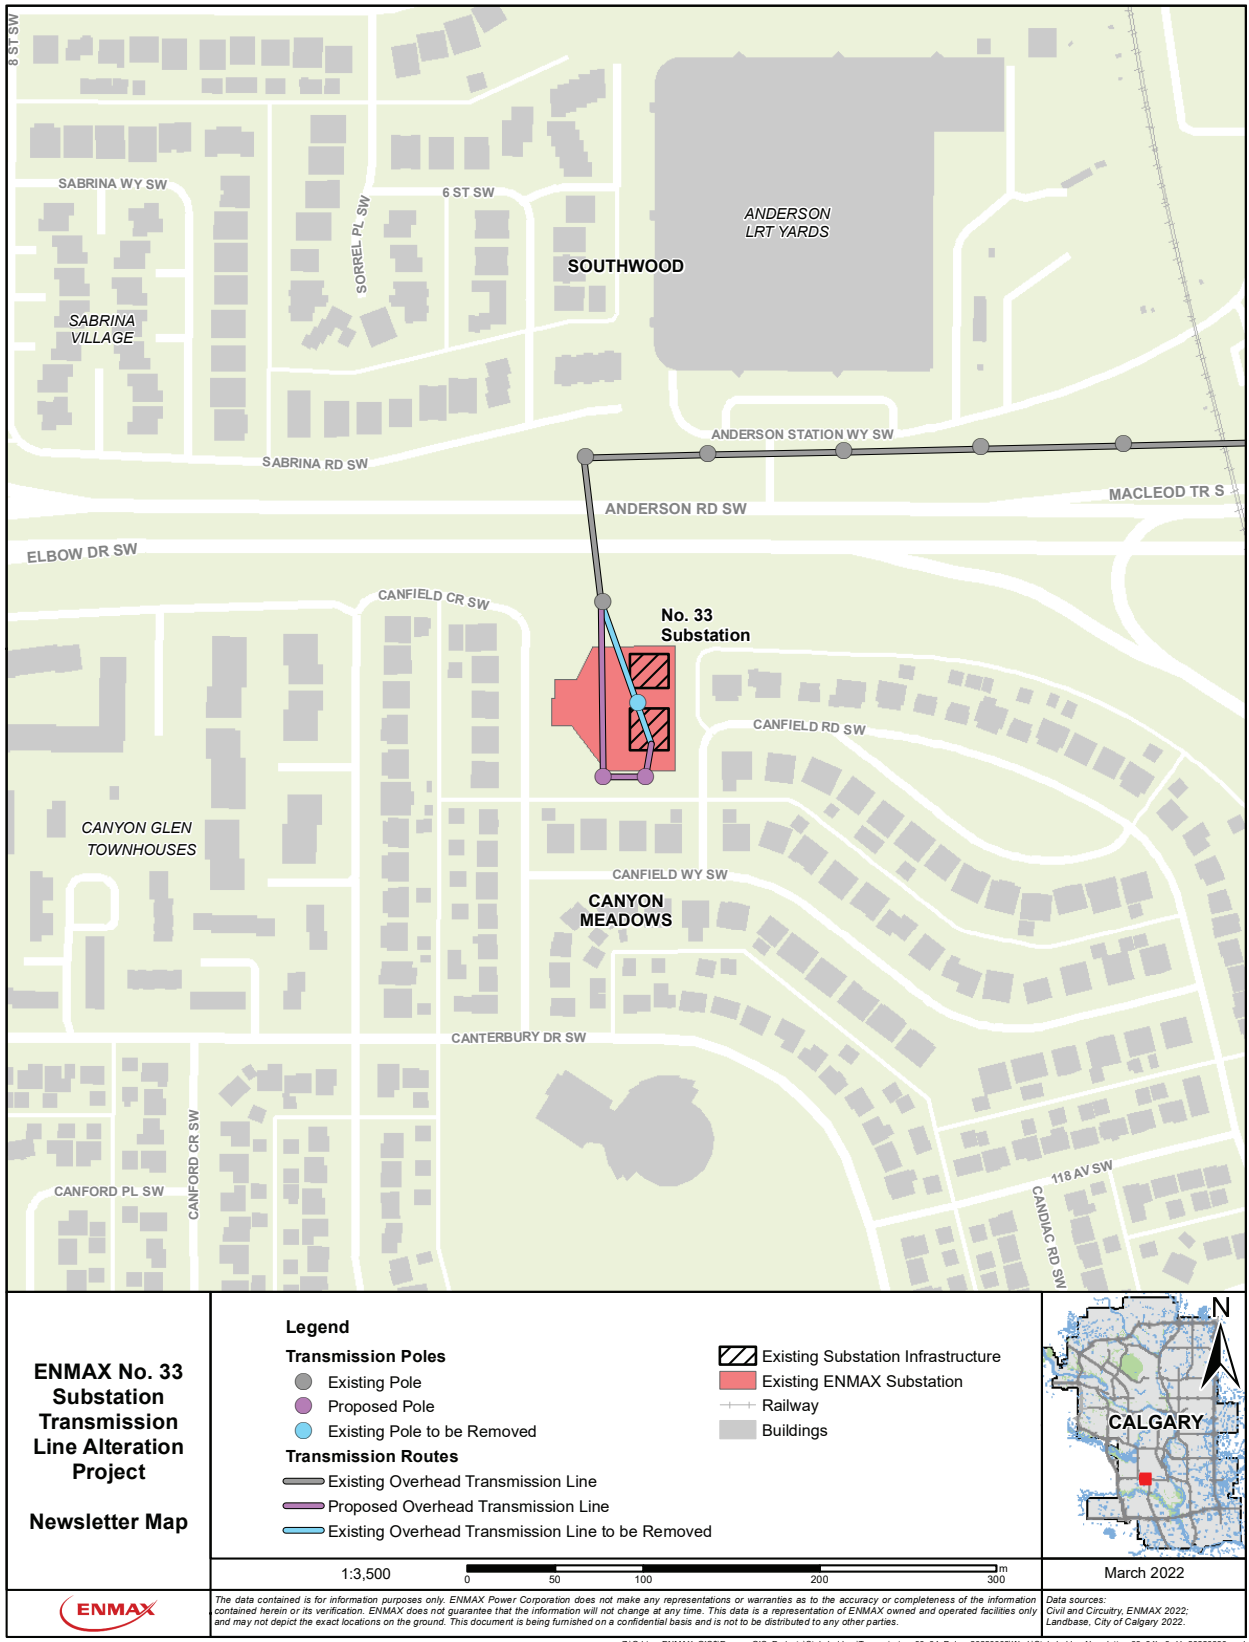

ENMAX Power plans to file a Letter of Enquiry application with the Alberta Utilities Commission (AUC) in Q2 2022. Subject to receiving approvals and procuring materials, construction is anticipated to begin in Q3 2022. Project construction is anticipated to take approximately one week with an expected in-service date in Q3 2022.

**For more than 100 years,
ENMAX Power has delivered safe
and reliable electricity in Calgary.**

CONSTRUCTION IMPACTS

Temporary access accommodations and road closures may take place periodically during construction.

ENMAX Power will work with stakeholders and The City of Calgary to minimize the impact to residences, businesses, and commuters in the area. There are no planned power outages impacting customers as part of the Project.

COMMITMENT TO COMMUNITY

We are committed to being a responsible corporate neighbour. Our commitment includes providing timely and meaningful engagement with stakeholders about our projects. We provide opportunities for stakeholders, including residents, occupants and landowners, to be informed about our projects, and to engage with us from the planning phase through construction and beyond.

ABOUT ENMAX CORPORATION

Headquartered in Calgary, Alberta, with operations across Alberta and Maine, ENMAX Corporation (ENMAX) is a leading provider of electricity services, products and solutions. Through its subsidiaries, ENMAX Power and Versant Power, ENMAX owns and operates transmission and distribution utilities in Calgary, Alberta and northern and eastern Maine, and safely delivers reliable electricity to Calgarians, including all Calgary homes and businesses, and to more than 159,000 customers in Maine. Through ENMAX Energy Corporation, ENMAX owns and operates 1,512 MW of generation and offers a range of innovative electricity, natural gas, energy and engineering services to more than 690,000 residential, commercial and industrial customers across Alberta. ENMAX is a private corporation and The City of Calgary is its sole shareholder.
